

ABHISHEK KUMAR SHARMA

Full-Stack Developer | React | Node.js | TypeScript

Jharkhand, India | +91-8002488825 | sharmaabhishek121198@gmail.com

GitHub: github.com/121198a | LinkedIn: [linkedin.com/in/abhishek-kumar-sharma-75306b1ba](https://www.linkedin.com/in/abhishek-kumar-sharma-75306b1ba)

PROFESSIONAL SUMMARY

Full-stack developer with hands-on project experience in React, Next.js, Node.js/Express, MongoDB and Python/FastAPI. Built applications featuring JWT authentication, role-based access control, REST API design and automated testing, with CI and Docker configuration in larger projects. B.Tech in Computer Science & IT (CGPA 8.06/10).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML5, CSS3, Embedded C

Frontend: React, Next.js, Vite, Tailwind CSS, React Router, Framer Motion, Responsive Design

Backend & APIs: Node.js, Express.js, FastAPI, REST API Design, JWT Authentication, Role-Based Access Control

Databases: MongoDB (Mongoose), MySQL, SQLite, Supabase

Testing & DevOps: pytest, GitHub Actions (CI), Docker, Git, GitHub, Postman

Embedded: STM32, HAL libraries, Oscilloscope Testing

PROJECTS

Bank Management System

React, Vite, Node.js, Express.js, MongoDB, JWT, Docker | github.com/121198a/bank-management-system

- Built a full-stack banking application with a REST API, JWT authentication using an HTTP-only refresh cookie, and role-based access for admin, employee and customer users.
- Designed 26 Mongoose models covering accounts, transactions, KYC requests, loans, insurance, fraud alerts and audit logs, with a department-scoped permission layer.
- Handled money with Decimal128 values, MongoDB transactions and idempotency keys; added input validation, sanitization and Helmet security headers.
- Added PDF statement generation, unit tests, a GitHub Actions CI workflow, and Docker and nginx deployment configuration.

VentureFlow Web Platform

Next.js 15, TypeScript, Supabase, Tailwind CSS, Framer Motion | github.com/121198a/ventureflow-web

- Developed a Next.js App Router platform with 20+ API route handlers covering authentication, a CMS, blog search and careers applications.
- Implemented role-based route protection in middleware, HMAC-signed session tokens, redirect sanitization and a Content Security Policy.
- Built a CMS with page versioning and publish/archive workflow; wrote 69 automated test cases for auth, rate limiting, search and CMS services.

UnboundX Admin Dashboard

React 19, Vite, Tailwind CSS 4, React Router 7, Axios | github.com/121198a/unboundx-admin-dashboard

- Built an admin dashboard with token-based login, protected routes and automatic logout on 401 responses.
- Created a reusable paginated, searchable data-table component shared across admin modules, plus a Level Activity builder for creating levels and tasks.
- Implemented a single configurable Axios client supporting bearer, API-key, cookie and basic authentication, with centralized error handling; configured Vercel deployment.

Network Monitoring Lab (Enterprise IT Operations)

Python, FastAPI, SQLAlchemy, SQLite, React, Vite | github.com/121198a/enterprise-it-operations-and-windows-infrastructure-management

- Built a FastAPI backend with 23 REST endpoints, JWT authentication, bcrypt password hashing and role checks.
- Implemented asynchronous SNMP polling that raises deduplicated device-down alerts and auto-resolves them on recovery, plus a UDP syslog receiver that parses and stores events.
- Built a React dashboard with 9 pages and protected routes; added pytest tests and scripts to simulate device failures and syslog traffic.

FIR Management System

Java Swing, JDBC, MySQL | github.com/121198a/FIR_Management_System

- Developed a desktop application for online FIR (complaint) registration with separate user and admin registration and login.
- Implemented complaint submission, status tracking and an admin approval workflow, persisting data in MySQL through JDBC.

2025

E-Commerce Web Application (WAGAN SHOP)

React.js, JavaScript, Context API, React Router, Axios | github.com/121198a/E-Commerece_Website

- Built the React front end of an e-commerce application with product browsing, category filtering, product details, cart and order placement.
- Developed customer and admin interfaces, including a user dashboard and admin screens for products, categories and orders, consuming REST APIs.

EXPERIENCE

Full Stack MERN Developer Intern Jul 2021 – Sep 2021

Ardent Computech Pvt. Ltd., Kolkata, India

- Built responsive web interfaces with React.js, JavaScript, HTML5 and CSS3, connected to REST APIs served by a Node.js backend.
- Developed reusable UI components to improve consistency across the interface.
- Implemented JWT-based authentication and route protection to restrict access to authorized users.
- Wrote backend API endpoints and database schemas to support CRUD operations.
- Used Git and GitHub feature branches and pull requests within an agile team.

Embedded Systems Intern Jul 2024

C.V. Raman Global University, Bhubaneswar, India

- Programmed an STM32 microcontroller in Embedded C using HAL libraries to generate a ramp waveform output.
- Verified output waveforms on an oscilloscope and iterated on configuration until requirements were met.
- Documented peripheral configuration steps and test results to support reproducible setup.

EDUCATION

B.Tech, Computer Science & IT 2022 – 2025

C.V. Raman Global University, Bhubaneswar | CGPA: 8.06 / 10

Diploma, Computer Science Engineering 2019 – 2022

Arka Jain University, Jamshedpur | CGPA: 8.95 / 10

CERTIFICATIONS

- Full-Stack MERN Development
- Java Programming (Core & Advanced)
- React.js — Component-Driven UI
- AWS Cloud Practitioner Essentials
